

1st European Workshop on Mobile IT in Law Enforcement

hosted by:

« waakzaam en dienstbaar »

January 11, 2012
09:00-16:00h

Host:
Politieacademie
Locatie Warnsveld
Rijksstraatweg 127
7231 AD Warnsveld
The Netherlands

Sharing Mobile IT Best Practices

Increasingly, police officers work with mobile devices. In order to be 'on the street' as much as possible and limit desk time, mobile technology is used to enable officers to do their job almost entirely in the field. But how does that work in practice? What mobile solutions are available? What best practices have been developed and can be shared from experience with other police forces? In a workshop setting, we invite police officers, researchers and industry experts to share their experiences and plans in making use of mobile IT. We also aim for establishing a more long term knowledge exchange.

Learning from You

All participants are invited to give a short presentation (5-10 min) of their plans and best practices. What are the core issues? What has worked well or perhaps less so? In-car or handheld? Any device? Any place? Any time? What conditions, support activities and risk mitigation is needed to make this work in a police context? What benefits can really be expected?

Learning from Research

The workshop is part of a larger research effort and we would like to share with you results from our studies, such as a trend report on ICT for policing and the role of social media.

Learning from Industry

Selected industry experts talk about the latest technology. What is being developed? What is needed in the back-end, in terms of infrastructure and information management?

Who can Participate?

The workshop will be held in English and is intended for police officers of all ranks from European police forces who either (a) have experience in and can report of using mobile IT (b) currently work on adopting mobile IT and would like present challenges and open questions.

What does it cost?

The workshop and accommodation costs €100 for police officers. This includes workshop participation and an invited welcome dinner, breakfast and lunch. The workshop is co-sponsored by the European research project COMPOSITE. Participants need to cover their own travel expenses.

How to Apply

To apply for the workshop, interested police officers can send an email to nico.kaptein@capgemini.com before December 15, 2011, including:

- a brief introduction of their position and police force and
- a short description of their interest in the workshop.

Places are limited and we aim for bringing people together from a variety of European countries and backgrounds.

This workshop is partially funded by the European Commission as part of FP7 in the context of the COMPOSITE project (contract no. 241918).
